## DETAILED ACTION

### *Specification*

1. The abstract of the disclosure is objected to because it contains the word "comprises" at line 6. Correction is required. See MPEP § 608.01(b).
2. The disclosure is objected to because of the following informalities: Page 4, line 17, replace "Figure 3" with -- Figures 3(a) to 3(e) --. Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Zimmerman.

Regarding claim 1, Zimmerman shows all of the limitations of the claimed invention with each of the commutator leg part (11) is formed separately from the corresponding commutator segment (1), and the commutator leg part (11) and the commutator segment (1) are fixed by welding.

Regarding claim 2, it is noted that Zimmerman also shows all of the limitations of the claimed invention.

### *Claim Rejections - 35 USC § 103*

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zimmerman in view of Katagiri et al.

Regarding claims 3 and 4, Zimmerman shows all of the limitations of the claimed invention except for a disk-shaped varistor having a hole at its center is mounted over the base portions of said commutator leg parts the reverse side to the winding in an axial direction of on a shaft, and each electrode of the varistor is soldered onto the corresponding base portion.

Katagiri et al. show a disk-shaped varistor having a hole at its center mounted over the base portions of said commutator leg parts the reverse side to the winding in

an axial direction of on a shaft, and each electrode of the varistor is soldered onto the corresponding base portion for the purpose of reducing spark.

Since Zimmerman and Katagiri et al. are all from the same field of endeavor; the purpose disclosed by one inventor would have been recognized in the pertinent art of the others.

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to include a varistor as taught by Katagiri et al. for the purpose discussed above.
